# Yarden Yosef

Skilled **Full Stack Developer** specializing in frontend and backend technologies. Proficient in developing dynamic web applications with captivating user interfaces. Known for **translating complex requirements** into **practical and innovative solutions**. Actively collaborates with team members to **achieve project goals** and drive successful outcomes. **Strong communication skills** facilitate seamless collaboration with colleagues and stakeholders. Consistently delivers **high-quality results** that exceed expectations.

## Work Experience

- Front End Developer**2022 - Present
- TrackBox*
- Implemented TrackBox Gaming's centralized platform using **Vue.js**, **Pinia**, and **TypeScript**, enabling seamless collaboration between iGaming operators and affiliates.
  - Developed intuitive user interfaces and integrated affiliate management tools for enhanced communication and streamlined sharing of campaign insights and data.
  - Created features that facilitate collaboration and ensure effective communication, fostering trust and seamless information sharing.
  - Played a crucial role in the development of a centralized platform, establishing mutually beneficial relationships between iGaming operators and affiliates while enhancing their overall operations.
- Full Stack Developer - Internship Position**2022
- SwagIT*
- Actively contributed to the development of a scalable e-commerce system from the ground up, utilizing **React.js**, **Express**, **MongoDB**, and **Node.js** to deliver a robust and efficient solution.
  - Assisted in implementing critical features such as secure payment processing, user authentication, and order management, ensuring a reliable and secure e-commerce experience.

## Education

- B.Sc. Computer Science**2019 - 2022
- Sapir Academic College*
- Developed strong programming skills and gained expertise in **algorithms**, **data structures**, **software development**, and **database management**.
  - Proficient in multiple languages (**JAVA**, **C++**, **Python**, **JavaScript**).
  - Solid understanding of **computer architecture**, **operating systems**, **networking**, and **cybersecurity**.

## Technology Stack

- Programming Languages:** HTML5, CSS3, JavaScript, TypeScript, Java, C++, Python.
- Front-end Frameworks and Libraries:** Bootstrap 5, React.js, Vue.js.
- Back-end Technologies and Databases:** Node.js, Express.js, MySQL, MongoDB.
- Version Control and Collaboration Tools:** Git, GitHub, GitLab.
- Cloud Services:** AWS.

## Military Service

- 2011-2014**    **Combat warrior - Israeli air force Iron Dome weapon system**
- Actively participated in a multitude of experiments and diverse operations, working closely alongside government organizations.
  - The role demanded exceptional resilience while navigating through high-pressure scenarios, ensuring the smooth operation and maintenance of critical strategic systems. This experience reinforced my ability to perform under pressure.
